

GOblend

Wine Blending & Management System

GOBLEND IS AVAILABLE FOR PRE-ORDER, INTRODUCTORY PRICE OF \$ 2500, DELIVERIES IN FEBRUARY 2021

GOBlend is a laboratory instrument that can automatically make blends of up to 4 different wines. The winemaker places samples of the component wines into the machine. Then, using an app on a supplied tablet, decides the percentage of each wine in the blend. With a click – the machine generates the blend in seconds. The accuracy on any component is +/- 1ml. Sample volume can be set from 50 to 200ml. The winemaker can then judge and adjust the sample – say increase the amount of wine#3 to 15% and lower wine #2 to 5%. A simple click on the app and the new sample is made.

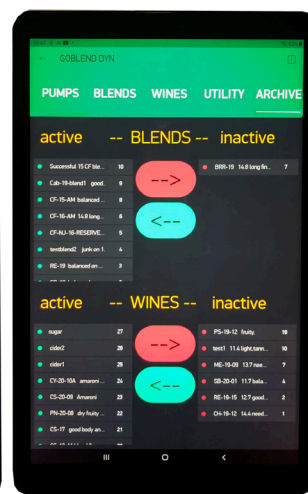

In addition to making physical blend samples, GOBlend provides a complete system for storing, and editing blends and the wines used for blending. These recipes can be stored and recalled later so the winemaker can remake an older blend to evaluate in minutes. Blend characteristics such as, color, body, and tasting notes can be recorded. Blend recipes can be sent by email to the winery, shared with others, or exported to excel. In essence, GOBlend provides a complete Wine Blenders Notebook.
