

Resource Label Group companies are strategically positioned to be the leading supplier of custom wine labels supporting the California wine market. We have decades of experience with California wine label design, label materials, adhesives, and liners specifically required for superior wine label printing. From concept and design to printing and application, we are an ideal partner, optimally positioned to service both new and established wineries.

### CUSTOM WINE LABELS

Superior quality and innovative printing are hallmarks of our label capabilities, and we welcome the opportunity to meet and exceed the expectations of your California wine brand. Utilizing the finest flexographic and digital offset printing presses available, we offer foil stamped labels, embossed labels, and variable data & imaging for your custom wine labels. We create truly one-of-kind wine labels, a critical element when competing in today's crowded and competitive wine marketplace.

### FINE WINE LABEL MATERIALS

The materials used to produce your labels are as important as how they are printed. Exotic and standard estate papers are available to each of our California winery clients. Our specialty wine label papers support premium design flexibility for your red wine varietals, and insure brand protection and exceptional label appearance for white wine chilled in ice bucket conditions.
