- Transit
- Wastewater
- Water

# A COMMITMENT TO EXCELLENCE

## FIRM OVERVIEW

Founded in 1919, Kennedy Jenks (KJ) is one of the nation's top environmental and engineering firms. The firm has grown geographically over the years, currently with 29 offices across the United States. As a full-service, multidiscipline environmental science and engineering consulting firm, KJ has a tradition of developing and implementing focused, reliable and client-centric approaches to environmental restoration projects that address a wide range of environmental concerns. KJ has a corporate commitment that promotes sustainable scientific and engineering solutions. We provide a full range of environmental engineering services, with core services that include initial site assessment through field investigations, pilot studies, feasibility studies, regulatory liaison, remediation design, construction management, and site closure.

The culture at KJ is based on honoring commitments:

- To our clients, we deliver value-added, innovative engineering and scientific services to achieve their goals
- To our employees/owners, we provide a supportive, team-oriented environment that is personally and professionally rewarding
- To our communities, we give the expertise, experience, and actions that result in a social benefit

## Top Clients Served

- Antelope Valley - East Kern Water Agency, CA
- BNSF Railway
- California Energy Commission
- Calleguas Municipal Water District, CA
- Carmel Area Wastewater District
- Castaic Lake Water Agency, CA
- City & County of Honolulu
- City of Austin, TX
- City of Lake Oswego, OR
- City of Roseville, CA
- Clean Water Services, OR
- Davis Public Works Department
- East Cherry Creek Valley Water Sanitation District, CO
- Eastern Municipal Water District, CA
- General Mills Operations, LLC
- Lockheed Martin Corporation
- Massachusetts Bay Transportation Authority (MBTA) Monterey County Health Department Whole Person Care (WPC)
- Padre Dam Municipal Water District, CA
- Pierce County, WA
- Sacramento Regional County
- Silicon Valley Clean Water (SVCW)
- San Francisco Public Utilities
- Washington State Department of Ecology

## SERVICES

### CONSTRUCTION MANAGEMENT

- Owner's project manager
- Project and program management
- Resident engineering
- Claims management and analysis
- Construction inspection and reviews
- Constructability reviews
- Cost estimating
- Document control
- Front-end procurement documents
- Safety planning
- Scheduling
- Utility coordination
- Project administration
- Value engineering

### ENERGY & RENEWABLES

- Facility energy audits
- Funding/incentive programs and revenue sources
- Renewable energy feasibility studies and assessments
- Renewable energy designs, construction management, and commissioning
- Sustainability consulting
- Climate action planning and compliance
- Grant writing
- Energy conservation measures
- Energy management planning
- Site geotechnical evaluations
- Project siting and permitting support
- Environmental resource studies and impact assessments
- Greenhouse gas inventories/emission baseline calculation

### ENVIRONMENTAL

- Assessments
- Regulatory compliance
- Risk assessment
- Remediation
- Modeling
- Solid waste facility engineering
- Permitting
- Industrial wastewater and remediation
- System operation and maintenance
- Sustainability expertise
- Site characterization
- Feasibility studies
- MCP Compliance/LSP Services
- Brownfield redevelopment expertise
- Stormwater management
- Construction phase services
- Legal support

### SITE/CIVIL

- Due diligence, site evaluation, and selection
- Site planning and design
- Utility infrastructure design
- Local, state, and federal permitting
- Surface water hydrology and hydraulic modeling
- SWPPP preparation
- Site construction-phase services
- Geotechnical evaluations
- Zoning and land use permits review
- Site grading and drainage design
- Erosion and sedimentation control
- Stormwater management
- BMP utilization
- NPDES permits
- Construction engineering oversight and observation

### WATER

- Construction management
- Energy management
- Environmental and engineering
- Groundwater
- Large pipe and pipe rehabilitation
- Plant and utility operations consulting services
- Salt and nutrient management
- Stormwater management
- Urban and agricultural water management
- Water resources
