

COMPATIBLE DESTEMMERS FOR GRAPE HARVESTERS

The **CLEANGRAPE** destemmer is a grape sorting system born from an accurate job - site research intended to reach the maximum cleaning level achievable for the harvested grapes, preserving the grapes integrity and the quality level, also in high-productive conditions. The sorting chain and the innovative shape of the destemmer enable a fast draining of the must and the grapes, expelling from the destemming chamber just stalks, leaves and shoots. The sorting chain can be regulated independently, letting the operator to regulate it at his own operative need, without altering the working speed. With the aim of meeting all needs and improving the performance as much as possible, LaCruz® made some specific technical and mechanical changes by developing two different versions of the **CLEANGRAPE**:

VERSION WITH ONE SINGLE SHAFT (CG315LC)

Technical features

Code	Length	Width	Height	Max width
CG315LC	166 cm	51,5 cm	93 cm	75 cm

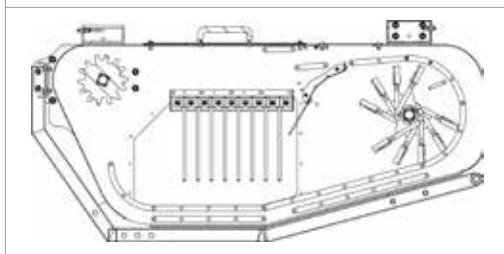

VERSION WITH TWO SHAFTS

Technical features

Code	Length	Width	Height	Max width
CG415LC	196 cm	51,5 cm	85 cm	73 cm
CG326LC	212,5 cm	49,5 cm	92,5 cm	71,5 cm

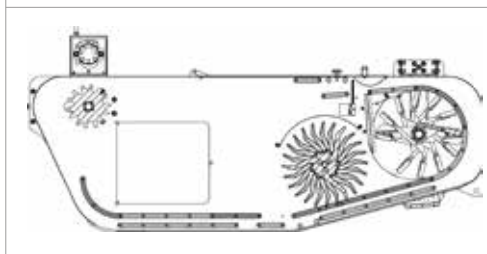

VERSION WITH ONE SINGLE SHAFT

cod. CG315LC

VERSION WITH TWO SHAFTS

cod. CG415LC

VERSION WITH TWO SHAFTS

cod. CG326LC
