

SPEDO IN-RROW CULTIVATORS

IN-RROW MAINTENANCE TOOLS FOR VINEYARDS

Model MIP01014J

Manufactured by Spedo

Very effective tools for under vine maintenance. This in-row blade undercuts weeds, while at the same time loosening and turning back the soil. The cutting blade hydraulically retracts around the base of the vine without damage. The unit was developed for one side weeding only, so as to operate at higher speeds with safe, accurate control. Also, standard is a remote control joystick which allows the operator to retract the blade when required. Many options are available: Retractable 16" Rotary Hoe, 19" Flail Mower, Power Disc, and Back Fill Disc.
