SYSTEMS

Sanitary and Utility Process Systems

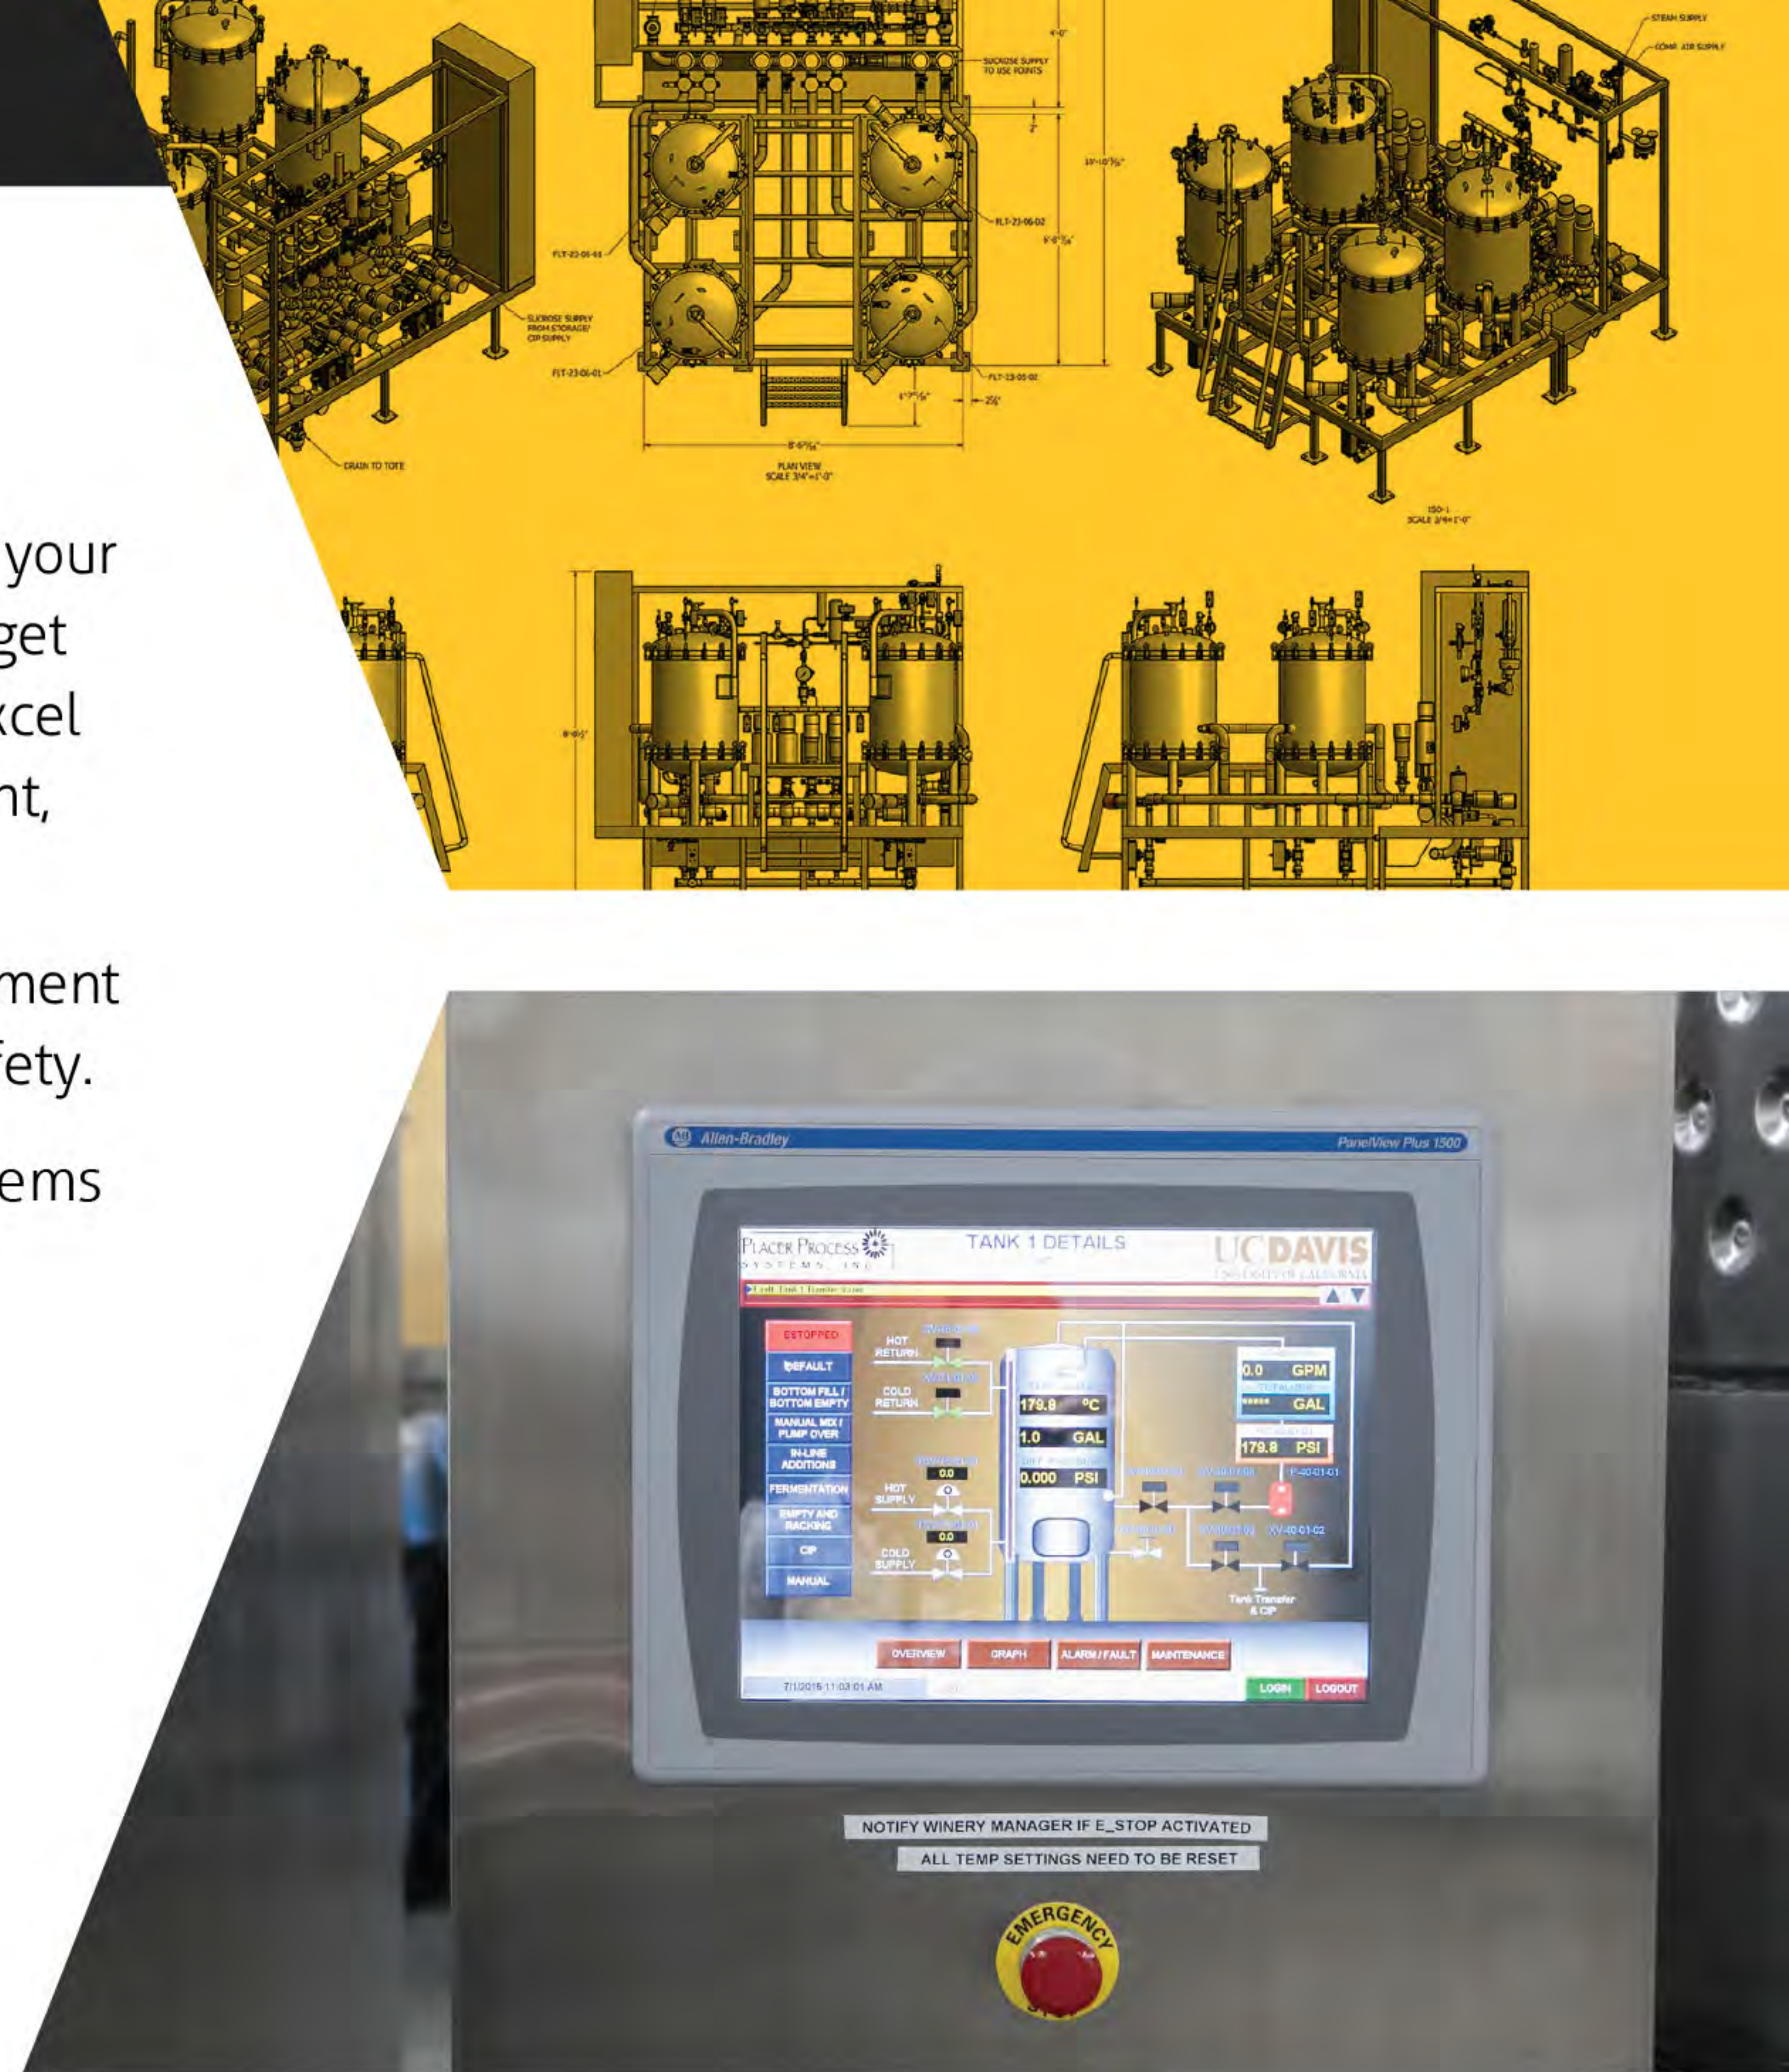

## Design Build

At Placer Process we will work with you to develop the scope for your project based on your requirements including schedule and budget with a focus on performance, safety and the environment. We excel in CAD drawings, design services, fabrication, project management, and field services.

We also audit facilities and provide recommendations for equipment and assemblies to help optimize productivity, efficiency, and safety.

- ▶ Turnkey Design and Fabrication of Process and Utility Systems
- ▶ Custom fabrication of Process Skids
- ▶ Design Build services for Expansion and Continuous Improvement projects
- ▶ Control Systems with PLC and HMI Programming
- ▶ Project and Construction Management
- ▶ Site Installation and Planning Services
- ▶ Start-up Support and Operator Training
- ▶ Audits and System Analysis

*Complete Sanitary and Process Utility Systems from Design and Fabrication to Installation and Control Integration.*

## Types of Projects

Every project is different. Due to our experience with designing and building custom skids, and repeated process and utility piping solutions, we are uniquely qualified to solve virtually any challenge you can give us. We can be your go-to strategic partner for all things in your plant relating to process and utilities.

Examples include:

- ▶ Clean-In-Place (CIP) Systems
- ▶ Bulk Ingredient Receiving Storage and Distribution
- ▶ Blending and Batching Systems
- ▶ Thermal Process and Pasteurization Systems
- ▶ Mixproof Valve Manifolds
- ▶ Sanitary Air Systems
- ▶ Steam, Condensate and Water Utility Services

California General Engineering Contractor Class A License 845295  
Oregon Commercial: CGC2 General Contractor 2 License 187865  
Nevada General Engineering Contractor License 0080747  
Hawaii General Engineering Contractor Class A License AC-31513 Washington  
General Contractor License PLACEPS866RC

## Our Expertise Creates Our Value

- ▶ Sanitary Process System Expertise
- ▶ Engineering & Design Driven
- ▶ Breadth of Projects
- ▶ General Contractor—We Do It All
- ▶ Committed to Quality & Safety
- ▶ Best Practices & Innovation Driven
- ▶ Meet All Regulatory Requirements
- ▶ Client Focused, Bottom Line Oriented
- ▶ Committed to the Environment
