

THE RANGE OF MACHINES :

▶ XT-LEVEL :

Inspection of the filling level and the cork stopper.

▶ XT-CAPS :

Inspection of the capsule or muzzle.

▶ XT-TURB :

Inspection of the transparency of liquids.

THE POINTS TO KNOW :

▶ MODULARITY :

Machine inspection technologies can be combined, example: XT-LEVEL-CAPS

▶ COMPACITY :

The space requirement is very small on the line.

▶ ADAPTABILITY :

The camera's field of view is adjustable thanks to a precise linear axis.

▶ WASTE MANAGEMENT :

Can control an existing ejector.

▶ ERGONOMY :

A touch screen allows you to start and monitor production.

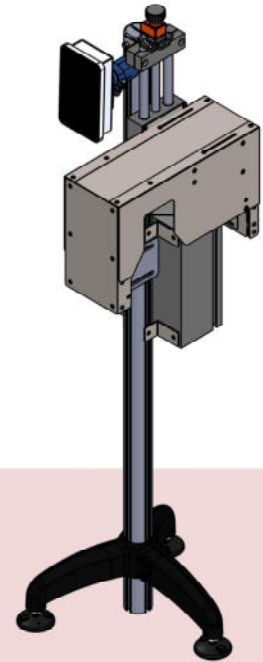

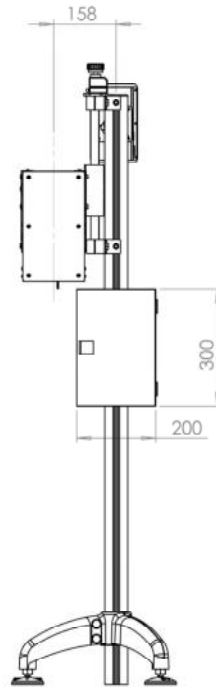

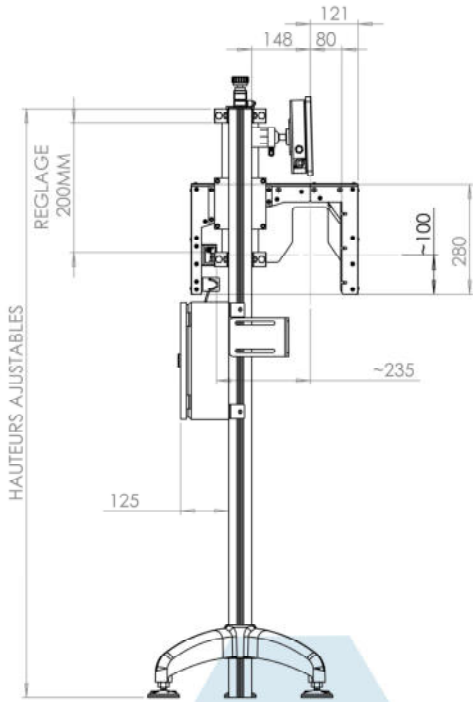

▶ FRENCH MANUFACTURING :

Complete mastery of hardware and software.
