

Epta Green Bench-graft Vine

Introducing our new green potted vine product, the EPTA Green Vine:

Applying our extensive expertise, we have created a low-profile pot that is ideal for manual planting but strong enough to withstand machine planting, making it easier & faster to grow plants without sacrificing the growth and root development.

The EPTA Green Vine advantages include a **compact design** **AND** an **inoculation** of purer strains of beneficial microbes.

Plant the EPTA Green Vine:

For optimal root development while providing longevity of the vine through **our beneficial microbe inoculation**. Our microbes fight against pathogens, form symbiotic relationships helping the plant obtain nutrients & preys on pathogens directly.

100% Guarantee backed when planted by us AND, when an application of our EPTA Blend bio-fertilizer booster is administered. Excluding any catastrophic event or management error.

EPTA Green Vine 12”

WHEN TO ORDER:

AnyTime - Year Around

Typcial Planting Season: April 15th to July 31st.

**Not for replants in established vineyards, not for dry farming planting, not for inexperienced planters, not for irrigation systems not ready for planting.*

Planting with EPTA Green

EASIER, FASTER, More EFFICIENT: OPTIMAL RESULTS

EPTA Green Features:

- ✓ Measures only 2x5 inches (*small pot profile encourages air root pruning*)
- ✓ Machine planting ready
- ✓ 7 weeks from grafting to delivery
- ✓ Biodegradable *Corn based PLA netting*
- ✓ Minimizes transplant shock
- ✓ Reduction in labor costs
- ✓ Microbe inoculation that mitigates & combats common Grapevine Trunk diseases such as (*Blackfoot, Petri, Young Esca*) AND Eliminates *J-rooting and Deformed Root Development*
