At the heart of e*x*cellence

## KNOWLEDGEABLE CRAFTSMEN

Our cooperage is based in the heart of the Cognac region, where our story began in 1989, and we hold a deep attachment to our terroir. Through the manufacturing of casks, we preserve the hand-crafted heritage of the cooperage trade. We have developed each of our collections by combining our coopers' and winemakers' expertise, to enhance the unique character of wines and spirits.

Today, our savoir-faire is concentrated in 4 areas:

- Wood expertise in the forests
- Staves mills
- Barrel manufacturing
- Barrel repair

Our history is written every day, at the heart of excellence.

## AT THE TOP OF THE TREE

In close collaboration with the wood industry's officers, and our timber contractors, our buyers select a diversity of stave quality logs, a variety of the best possible quality, coming from the greatest French forests. Our stave mills take these logs and proceed with the splitting of logs.

### **Our commitment to quality:**

- Our QSE policy verifies the superior quality of our products as well as our conformity to food grade standards in the production and repair of our barrels.
- Our PEFC certification shows our commitment in favour to the renewal and sustainable management of the forest.

management of forests / [pefc-france.org](http://pefc-france.org)

## LEARNING PATIENCE

Our profession comes from ancestral and artisanal savoir-faire which reveals itself with patience and precision. In our wood yard, we age our staves in order to offer you a natural air-dried process, from long to extra-long. This time represents a promise of quality which accompanies your wines and spirits throughout their maturation and ageing process.

## ENHANCING THE SENSES

Our expertise allows us to control every stage of production, including the natural air drying process. Just like a winemaker would with grapes, we meticulously select our staves, in order to extract only the best.

## CONTINUING THE MEMORIES

We share a passion, we speak the same language: respect for the raw materials, mastery of craftsmanship and sharing knowledge.

This commitment is treasured by each of our staff members and contributes to the success of our cooperage. The experience of our coopers is an art which is passed on from generation to generation.
