- Packaging
- Reverse Osmosis
- Scale House
- Sparkling
- Tank Gauging
- TankNet Interface
- Trial Blends
- Vineyard Management
- Work Orders
- Work Order Real Time

WMDB simplifies your data entry and tracking

Monitor your data, simplify paperwork, and integrate with ERP, finance, enterprise apps, temperature control systems, analytical equipment, weigh stations, and bar coding equipment. Data entry error fixes are fed forward to subsequent working transactions, so there is no need to undo every single past related transaction.

Modern features with the same powerful functionality

The screenshot displays the WMDB software interface with a top navigation bar containing modules: Inquiry, Data Entry, Work Orders, Lab, Dry Goods, Utilities, Costs, GC, Commitments, Scale House, Billing, and Admin. Below this is a toolbar with icons for Single Tank Inquiry, Backtrack a Tank/Blend, Flexible Inquiry Center, Single Barrel Inquiry, Bottling Center, Reports, Generate 5120.17 (702), Cellar Maps, Trial Blends, Tank Gauging Calculator, and Forward Tracker.

Two main data entry windows are shown:

- Enter Wine Activities:** Features a transaction entry form with fields for Transaction (RAK Rack), Date (12/2/2020), Time (12:00 PM), Tag (TEST), and By. It includes a 'Last Entry' section with a table for tank data and a 'Gain/Loss' section showing 0 GAL.
- Single Tank Inquiry:** Displays current inventory for Tank 1004 (SW, DY, 100,000 GAL) and Blend 18MWAL003AGV (10 GAL, 8/11/2019). It includes a detailed analysis table with columns for Varieties, Vintages, Appellations, and Vyd Blocks, along with various filters and a search bar.

Watermark text in the bottom right of the screenshot reads: "The Winemaker's Database Inc. 59 N Santa Cruz Ave, Los Gatos, CA 95030 (408) 688-1119 www.wmdb.com"
