BIO-ROTOR BRF: Eats Weeds NOT Irrigation Lines

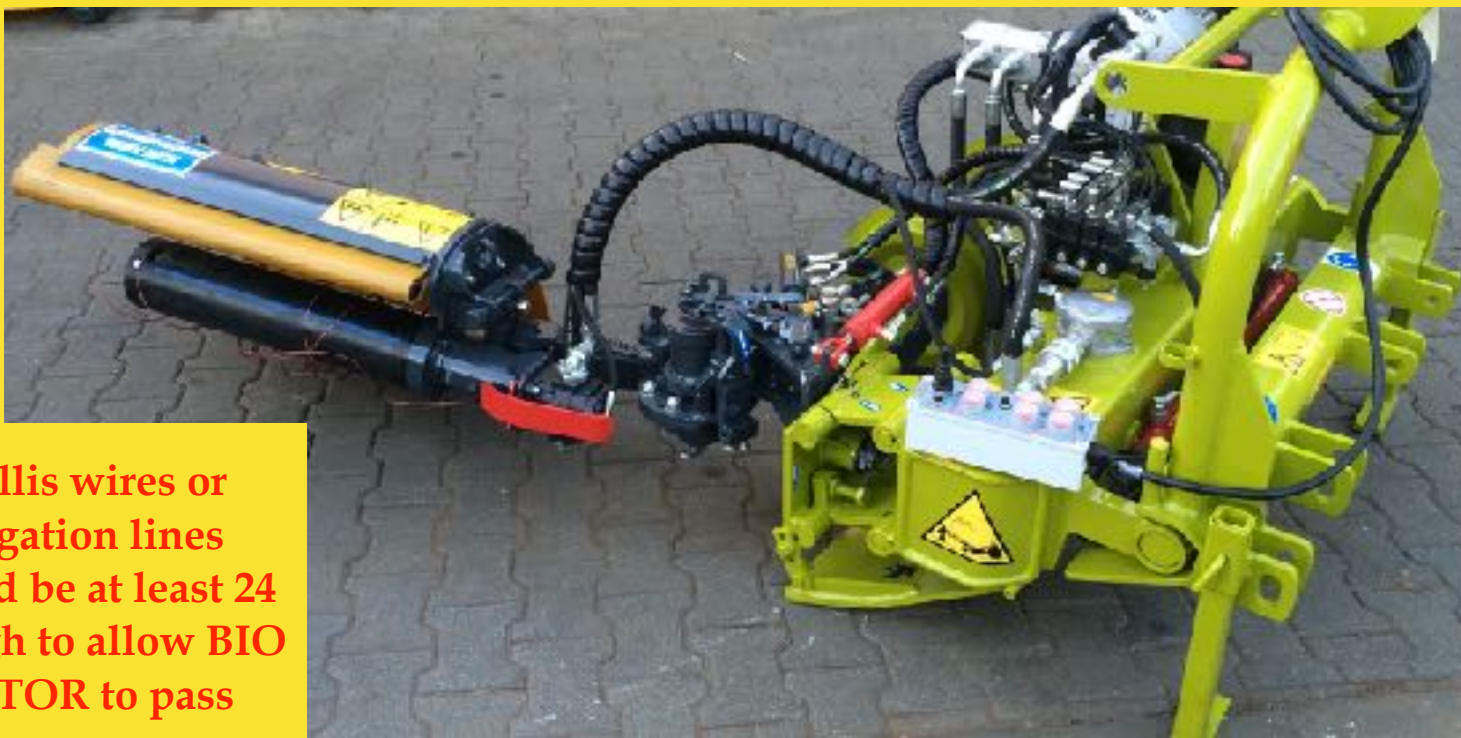

[www.butlerent.com/bio-rotor/](http://www.butlerent.com/bio-rotor/)

tel: 731-694-3178

Any irrigation lines on the ground should be tied/fixe every 10' to prevent entanglement

Electric-over-Hydraulic Control Units Allows on-the-Fly Adjustment of lateral shift (to reach under branches or trellis), tilt of BIO ROTOR head & working height (wheels)

Trellis wires or irrigation lines should be at least 24 in. high to allow BIO ROTOR to pass
