About

Vinoseal is changing the way the world thinks about closures.

Why Vinoseal

- Absolutely no impact on aroma and flavor
- 100% recyclable, from natural materials
- Amazing customization and design options
- Makes your brand or product unforgettable
- Stable conditions after bottling
- Easy opening and closing

Sustainability

100% recyclable closure

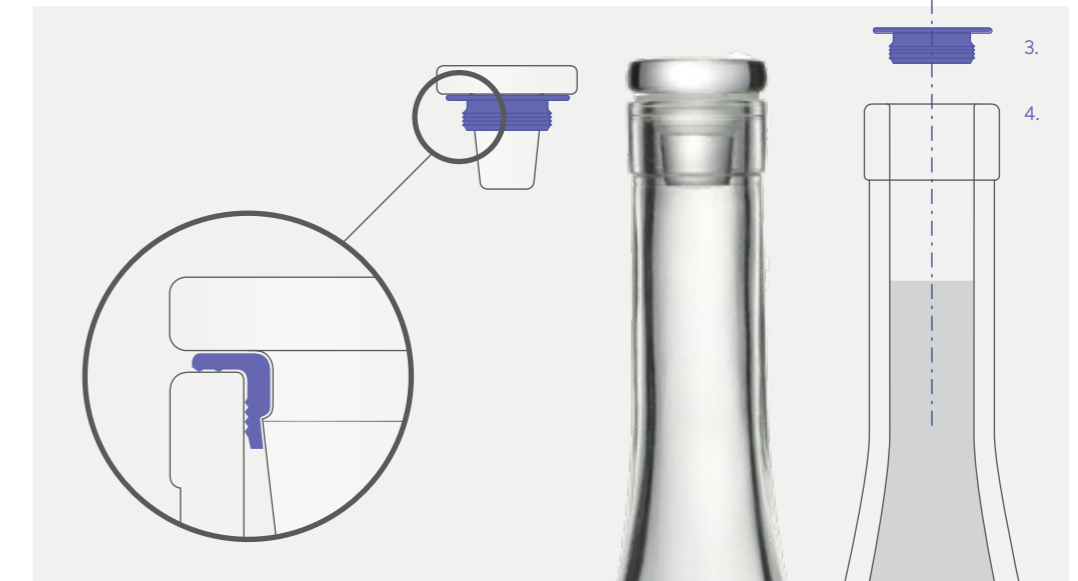

Glass is a substance made from natural materials only and it is one of the few materials that is 100% recyclable without loss of quality. Glass is the archetype of sustainable packaging and as such is usually the first choice for consumers who are environmentally conscious. The sealing ring is recyclable in the same way as low density polyethylene (used in juice and milk cartons). The result is fully recyclable closure.

How it works

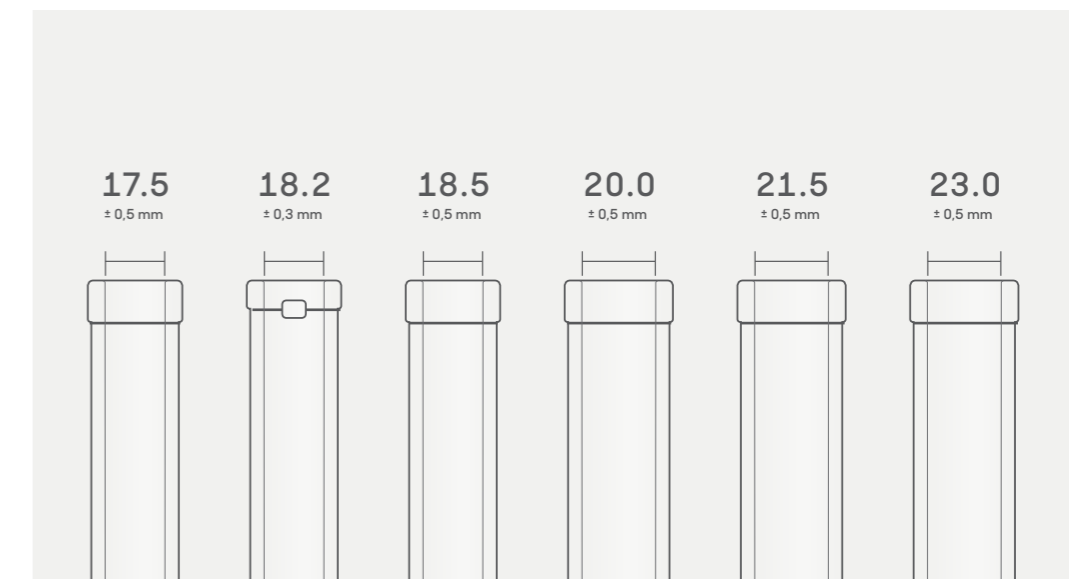

The Vinoseal closure is a part of system consisting of a closure, a bottle, and a capsule. The capsule (1) ensures the safety of the system during storage and transport. The glass closure (2) is made from high quality glass and is resistant against mechanical damage. The sealing ring (3) is made of Elvax by DuPont and contains no phthalates or allergens. The closure can be inserted into the bottle (4) manually or by a semi or fully automatic bottling machines.

Vinoseal system

Vinoseal sizes

The size of the closure corresponds to the inner diameter of the bottleneck. You can find a list of bottles that are compatible with the Vinoseal closure online at www.vinolokbottles.com
